

In addition to **DropSwipe**, collectors have access to all the standard tools from NFT marketplaces, such as make offer, rarity filtering, rarity score, trait information, floor price, total holders, daily volume, and grid mode accessible from the global swiper page.

**DropMagnet** works on any browser, using deep links to interact with wallets such as **Phantom** and **MetaMask**.

**DropMagnet's** unique discovery and curation tools augment the natural ability of humans to make fast decisions, helping them to choose favorites without the hassle of lists.

Once collectors have built their NFT collection, they can also harness the power of **DropMagnet** to share their collection and further give them utility.
